

## SUMMER SCHOOL

**August 21-25, 2023**  
**Berlin, Germany**

The training will ensure the improvement of skills in such different areas as Microelectronics for Space Applications, Earth Observation, Space Technologies, including methods of application of the present space observations to examples of the best European practices.

Moreover, the training will cover such important topics, as Labour market, Project Management, Presentation Skills, and Intercultural Management.

## WHAT TO EXPECT

### IMPROVEMENT OF SKILLS

Microelectronics for Space Applications, Earth Observation Technics, Remote Sensing, Space Technologies, Digital Systems Development, Soft Skills for Engineers, Intercultural Communication

### NETWORKING

Meetings with the representatives of universities and scientific institutes, experience exchange, share of best European practices and new collaboration opportunities

### STUDY VISITS

During the training study visit to the Futurium ("House of the Future") will be organised. The participants will visit fascinating exhibitions on aviation, computer science, robotics, and space technology.
